

Database Backups

There are two backup methods we are currently using: automatic backups of individual courses, and manual backups of the entire database.

Manually Backing up the Database

Navigate to the [DreamHost Control Panel](#) and log in using the admin account.

A screenshot of the DreamHost login interface. It features a light gray background with a blue border. At the top center is the DreamHost logo, a blue circle with a white crescent. Below the logo is the text "Sign in to your account". There are two input fields: the first contains the email "Admin@conformancefasteners.com" and the second is labeled "Password". Below the email field is a link "Reset password" in blue. To the right of the password field is a blue button with the text "Sign in" in white. At the bottom center is the DreamHost logo again, consisting of a blue circle with a white crescent and the text "DreamHost" in white.
