

Database Backups

There are two backup methods we are currently using: automatic backups of individual courses, and manual backups of the entire database.

Manually Backing up the Database

Navigate to the [DreamHost Control Panel](#) and log in using the admin account.

A screenshot of the DreamHost login interface. It features a purple header and footer. The main content area is light gray. At the top center is the DreamHost logo, a blue circle with a white crescent. Below the logo is the text "Sign in to your account". There are two input fields: the first contains the email "Admin@conformancefasteners.com" and the second is labeled "Password". Below the email field is a link "Reset password" in blue. To the right of the password field is a blue button with the text "Sign in". The footer contains the DreamHost logo and name.
